Riding a bike on the most dangerous road in the world
High in the Andes, the North Yungas Road goes from La Paz, the highest capital city in the world, to Coroico in the Yungas region of Bolivia. The road is only about ten feet wide and has a drop of 1,000 feet. It's called 'Death Road' because of the number of accidents, and in 1995 it was officially declared 'the most dangerous road in the world.'
'One mistake and you are dead.'
Since it first opened in 2006, there are 100 bikes and trucks on the old road. But now thousands of mountain bikers come from all over the world to take the most exciting ride of their lives. They start at La Comba, 13,400 feet (4,080 metres), and go down to 5,000 feet, crossing 200 steep, 100 metre long descents. The road is very narrow, and the weather is very hot. It's a real challenge, and you have to be very careful. If you go to La Paz, you have to see the North Yungas Road, and if you go to Coroico, you have to see the North Yungas Road. It's a real challenge, and you have to be very careful. If you go to La Paz, you have to see the North Yungas Road, and if you go to Coroico, you have to see the North Yungas Road. It's a real challenge, and you have to be very careful.
