Peter and the children flew out of the room and down the river – then out over the sea. They flew for many days and nights. They were hot, then cold, then hot again.

Once, Michael began to sleep. He fell down and down to the sea. Peter watched him and laughed!

Seconds before Michael went into the sea, Peter flew down and caught him.

The children couldn't fly fast, and they often hit clouds. Sometimes Peter was bored, so he flew away from them and had adventures. Many times, he nearly forgot about them!

Holmes smiles. 'That's interesting. But I must work now, and you must leave. Please close the door after you.'

Roylott does not leave. He walks to the chimney and takes the metal poker in his hands. He bends it quickly with his two big hands. Then he throws it down at his feet. 'I'm leaving because I want to leave, not because you tell me!' he cries angrily. 'Be careful, Mr Holmes!'

Then he walks out of the room, looking all the time

at Holmes.

'My poor poker,' Holmes says quietly, walking to the chimney. He is not a big man, but he takes the poker and quickly unbends it again. Watson's mouth opens and Holmes begins to laugh.

'I'm not afraid of Roylott, Watson! But I need to know something about his wife's will. I'm going out now.'

Humpback whales migrate further than any other mammal – up to 17,000 kilometers every year. They migrate for the first time with their mothers, and then they usually make the same journey every year for the rest of their lives. During their journeys, humpback whales make special sounds, like a song. All humpback whales in the same part of the world sing almost the same song, and it changes every year!

**Emperor Penguins**  
In summer in the Antarctic, emperor penguins hunt for krill, fish, and squid in the ocean. In March, when the ice gets thicker, adult penguins migrate up to 200 kilometers across the ice to their breeding places. After the females have laid their eggs, they go back to the ocean to feed. The males keep the eggs warm on their feet. They often have to wait for up to 16 weeks for the eggs to hatch, and they do not eat during this time.

**Discovery** Penguins cannot walk well, so they often push themselves across the ice on their stomachs.

**6 Ocean Migrations**  
Many fish migrate around the ocean, and some ocean mammals migrate, too. Some make very long journeys.

**A Humpback Whale**  
**Whales**  
Many whales, like humpback whales and gray whales, migrate to polar oceans in summer. Here they can find lots of their favorite food, krill. Young whales cannot keep warm enough in very cold oceans, so in winter, the whales migrate back to warmer, tropical oceans to breed.
